Table of Contents

Table of Contents	2
Introduction	3
Accessibility Issues	3

1. Introduction

This document serves to be an outline of any accessibility issues found within our project Memory Leak. To find these errors, we implemented the WAVE tool, which is a Google Chrome extension that analyzes web pages for inconsistencies in accessibility and reports them to the user.

2. Accessibility Issues

a. Log-in Page - '\'

- i. Memory Leak logo is missing alternative text

b. Home Page - '\'

- i. There is a an empty button with no content in the header, this exists across all pages

c. Question Page - '\question\[questionID]'

- i. Forms are missing labels for comment and answer input tags
